Syloti Nagri MSK keyboard for Windows

Typing the hasanta (<Shift>6) between two consonants will display a conjunct if one exists in the font for that combination, otherwise the hasanta will be displayed. e.g.:

    k^k displays: ꠇ꠆ꠇ

    t^r displays: ꠔ꠆ꠞ

    m^k displays: ꠝ꠆ꠇ

The hasanta will automatically display the Bengali form (্) when it is word-final: ꠔꠣꠞ্

To force display of the explicit hasanta between two consonants which would normally form a conjunct, use <Ctrl><Alt>6 in place of <Shift>6.
To force display of the Bengali form of hasanta, use <Shift><Ctrl><Alt>6.

Note:
<Shift>S is a shortcut for ^s	eg: pS	ꠚ꠆ꠡ	(= p^s)
<Shift>L is a shortcut for ^l	eg: AL	ꠀ꠆ꠟ	(= A^l)
<Shift>V is a shortcut for ^t	eg: sV	ꠡ꠆ꠔ	(= s^t)
v is a shortcut for ^r	eg: pv	ꠞ꠆ꠞ	(= p^r)
